

CATALOGUE 2022

Your interior *to you* Design!

About us

GATES CREATIONS was founded in 2021 and was born from a ten-year experience in the design and manufacture of elements for the industrial work.

Gates Creations is a company specialized in the manufacture of aluminum products and is dedicated to the production of gates, pedestrian gates, fences and balustrades from the French territory and also for other countries.

Mission

Our mission is to offer a range of products: fences, gates, pedestrian gates, and balustrades that are made to measure, innovative and high quality, while fulfilling our obligations to society and the environment.

Our products are made of quality and know-how, which is a guarantee of trust for our customers.

Vision

To provide our customers with our experience in design and manufacture through innovative and quality products.

To be the reference company for costumers and be able to deliver our products directly.

Values

Innovation
Customer value
Creativity
Excellence
Integrity

SUMMARY

PAGE 04

Choose your model

Models exclusively personalized to measure and available in 4 ranges: City, Élégance, Classique and Treasure.

PAGE 07

City

The City Collection Is composed of contemporary style models.

PAGE 17

Élégance

The Élégance Collection combines modernity and simplicity with a touch of raffi nement.

PAGE 23

Classique

The Classique collection offers more sober models, a traditional point.

PAGE 29

Trésor

The Trésor collection presents semi-modern models with a touch of originality.

PAGE 37

Lasers Decorations

A range of laser decorantions to choose from to better customize your project.

PAGE 44

Color Chart

We offet standard RAL Matt, Sanded or Textured colors as options.

PAGE 46

Take your measurements

A guide for taking the necessary measurements.

PAGE 49

Your project

You have a Project in mind?
Send us your design, together we will create your projetc.

Harmonize your exterior.

Our Products are made of aluminum, made to measure, easy to maintain and resistant to climate changes.

Soapy water maintenance is simple and effective for preserving and keeping your gate clean.

Our Expertise and your Creativity, stunning results.

Create with us your ecological and economical custom aluminum solution.

Before you start, find out about the regulations in force in your municipality and consult the local urban plan.

Our gates comply with urban planning standards.

We support you to make your project a reality.

We offer timeless and eco-friendly models in 4 customizable ranges with solutions adapted to different styles.

For an aesthetic and coherent whole take into account the style of your property.

Aluminum gates are a great choice for creating millwork that blends in perfectly with your home's environment.

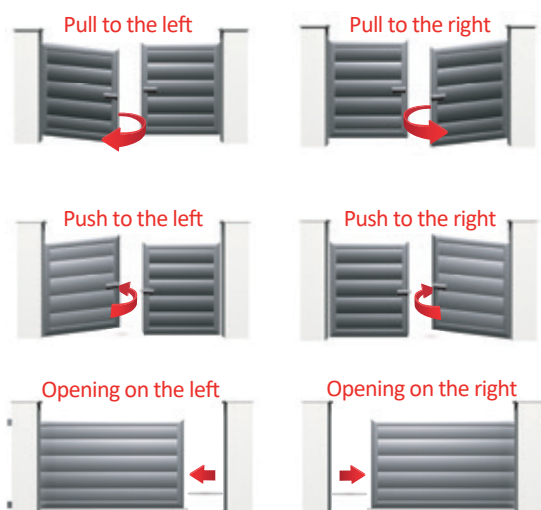

Choose your model

1 | Type and Opening of the gate

We offer swing gates and sliding gates.

The **swing gate** is characterized by two symmetrical or asymmetrical leaves opening to the outside (right or left hand pull) or inside (right or left hand push) of the property and requires a space for opening.

The **sliding gate** opens sideways to the right or left and requires space on the sides for its opening and proper operation.

2 | The model

The **City Collection** consist of contemporary style models with customizable laser decor.

The **Élégance Collection** combines modernity and simplicity with a refined touch, a collection with a pure and contemporary aesthetic

The **Classique Collection** offer more sober models with horizontal or vertical blades, a more traditional collection.

The **Trésor Collection** present semi-modern models, a mix of the Elégance and Classique ranges with a touch of originality.

3 | Visibility

The gate is an essential element for your exterior, it finishes your degree of privacy and secures your home.

Installing a gate allows you to secure the exterior of your home with a degree of discretion and privacy.

An **openwork gate** is allows more visibility.

A **semi-open gate** allows visibility on the upper part of the gate depending on the model chosen.

A **solid gate** provides a greater degree of privacy depending on the height of the gate.

4 | The Color

Choose your color and discover our color chart p. 52

A wide range of RAL colors with matt or sanded finish.

If in doubt, do not hesitate to ask for a sample.

5 | Decorative laser decor

Gates Creations offer a range of laser-cut aluminum laser decor for gates, fences, and pedestrian gates, with a wide choice of customizable patterns.

The laser cut can be more or less open, depending on the desired design, and brings a decorative touch. Our decorative laser decor are perfectly adjustable to the chosen patterns and guarantee an aesthetic result according to your choice, perfect for all types of gates and fences.

Our designs can be customized to beautify and propose the desired degree of privacy. Do not hesitate to contact us or send us a sketch to make your laser cut, our design office will take care of your project.

6 | The accessories

To bring an original touch or more luminosity the accessories are essential.

Finishes, handles, glazing, leds, accessories harmonize your project and for more comfort also motorized.

For more information our technical team is at your disposal.

The Trésor Collection present semi-modern models, a mix of the Elégance and Classique ranges with a touch of originality.

Take your measurements

PEDESTRIAN GATES

Straight shape pedestrian gates

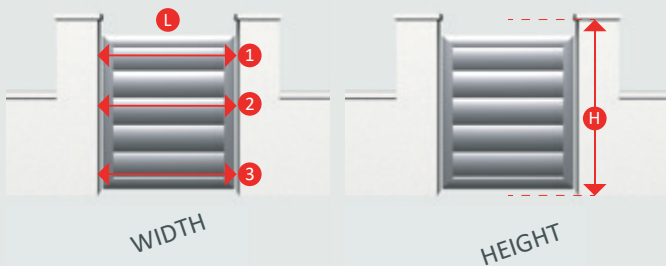

1 - Measure the distance between pillars in millimeters.

Take **3 measurements** between pillars at **3 different locations**.

Annotate the smallest dimension corresponding to the width

L = MM

2 - Measure the height of your pillars to the bottom of the cap H = MM

Choose the opening direction:

Pull to the left

Pull to the right

Push to the left

Push to the right

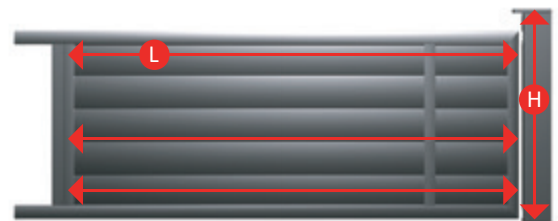

GATES

Straight sliding gates Sliding on rails.

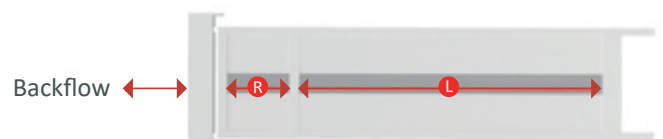

1 - Measure the distance between pillars and take **3 measurements** between pillars at **3 different locations**.

Annotate the smallest dimension corresponding to the width L = MM

2 - Measure the height of your pillars to the bottom of the H = MM

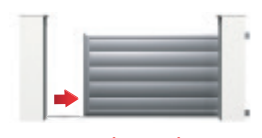

3 - The space for the discharge (R) must be provided, i.e. the space for the opening (400MM) + the width (L) of the gate.

Choose the opening direction:

To the left

To the right

Position yourself from the outside with your back to the street.

GATES

Straight swing gates

1 - Measure the distance between pillars (width in millimeters).

Take **3 measurements** between pillars at **3 different locations**.

Annotate the smallest dimension corresponding to the width.

L = MM

2 - Measure the height of your pillars from the ground to the bottom edge of the cap.

H = MM

Choose the opening direction:

Pull to the left

Pull to the right

Push to the left

Push to the right

Position yourself from the outside with your back to the street.

FENCES

Straight fences

1 - Measure the distance between pillars (width in millimeters).

Take **3 measurements** between pillars at **3 different locations**.

Annotate the smallest dimension corresponding to the width.

L = MM

We calculate the number of posts required according to the length between pillars for each element.

2 - Measure the height of your pillars from the ground to the bottom edge of the cap.

Annotate the smallest dimension corresponding to the height.

H = MM

Take your measurements

SLOPE

Sloping ground:

It is recommended to use a rangefinder to measure distances.

Width of the slope $L = \dots\dots\dots$ MM

Widths at level

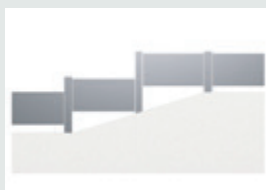

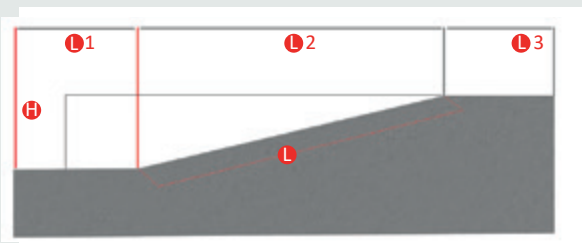

$L1 = \dots\dots\dots$ MM

$L2 = \dots\dots\dots$ MM

$L3 = \dots\dots\dots$ MM

Height of the slope

$H = \dots\dots\dots$ MM

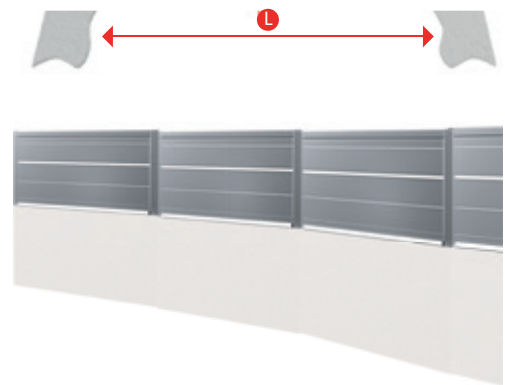

UNEVENNESS

Irregular pillars:

Indicate the smallest width between the pillars

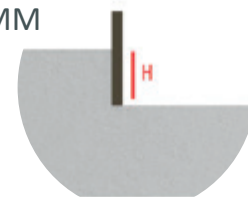

$L = \dots\dots\dots$ MM

Stall:

Take dimensions as shown:

$H = \dots\dots\dots$ MM

Angles:

Take dimensions as shown:

$L1 = \dots\dots\dots$ MM

$L2 = \dots\dots\dots$ MM

Your Project

To achieve something extraordinary
start by dreaming it.
